

MIL-SPEC FOAM

⊗ Hazard

Fires involving Class B flammable or combustible liquids in military, commercial land and offshore applications.

✓ Solution

U.S. Military F-24385F Certified ARCTIC™ 3% and 6% AFFF foam concentrates for use in ARFF vehicles, aircraft hangars, helidecks, naval/marine onboard firefighting systems, land/marine storage and terminal facilities.

When Fire Hazard is Present

YOUR BEST WEAPON IS SOLBERG

The great volume of Class B flammable and combustible liquids stored and used in the military and commercial applications presents a vast amount of ever-challenging risks. Fixed and rotary wing aircraft, support and maintenance facilities and naval/marine vessels require firefighting foam and fixed foam-water systems for protection. Solberg offers the best possible defense against these unique fire hazard situations.

Certified to Military Specification MIL-F-24385F, ARCTIC MIL-SPEC AFFF foam concentrates are extremely effective firefighting foams for flame knockdown, fire control, extinguishment, and burn-back resistance. Control, extinguishing time, and burn-back resistance are paramount to the safety of firefighters and protection of high-risk, high-hazard assets. ARCTIC MIL-SPEC AFFF foam concentrates are C₆ fluorochemical based and compliant to the United States Environmental Protection Agency (USEPA) 2010/2015 PFOA Product Stewardship Program. ARCTIC MIL-SPEC AFFF foam concentrates contain no PFOS, providing the best environmental profile for any Aqueous Film Forming Foam (AFFF).

ARCTIC MIL-SPEC AFFF foam concentrates are ideal for mobile and fixed emergency response firefighting platforms, which protect military and civilian aviation assets. Typical applications for MIL-SPEC AFFF foam include: ARFF vehicles, aircraft hangars, helidecks, naval/marine onboard firefighting systems, land/marine maintenance, tank storage and terminal facilities.

A solution certified to the highest military standards

SOLBERG ARCTIC MIL-SPEC AFFF foam concentrates are specifically intended for use on water-immiscible fuels such as aviation fuels, crude oils, and diesel and gasoline fuels. They are not intended for use on Class B polar solvent fuels (water-miscible) such as acetone, alcohols (ethyl and methyl) and methyl ethyl ketones. The foam can also be used to prevent re-ignition of a liquid spill and control hazardous vapors.

✓ Experience

Our experienced technical pros are known for their ability to identify solutions that are not only the most effective, but the most cost-effective as well. Solberg is your partner in value-engineered foam-water system solutions.

✓ Certifications

- UL Listed
- CAN/ULC CAT3 Listed
- ICAO Level C Certified

ARCTIC MIL-SPEC AFFF foam concentrates meet certification requirements for MIL-SPEC NFPA 403: Standard for Aircraft Rescue and Fire-Fighting Services at Airports; NFPA 409: Standard on Aircraft Hangars; NFPA 412: Standard for Evaluating Aircraft Rescue and Fire-Fighting Foam Fire equipment; NFPA 414: Standard for Aircraft Rescue and Fire-Fighting Vehicles and NFPA 418: Standard for Heliports; Department of the Air Force ETL 02-15: Fire Protection Engineering Criteria – New Aircraft Facilities; Department of the Army ETL 1110-3-484: Engineering and Design Aircraft Hangar Fire Protection Systems; Department of the Army ETL 1110-3-485: Engineering and Design Fire Protection for Helicopter Hangars; Department of the Navy ITG FY05-01: Design Criteria for the Fire Protection of Navy and Marine Corps Aircraft Hangars; Federal Aviation Administration AC 150/5210-6D: Aircraft Fire Extinguishing Agents.

In addition to MIL-F-24385F Certification, ARCTIC 3% MIL-SPEC AFFF (commercial container packaging) is Underwriters Laboratories, Inc. Listed in accordance with UL 162 (Standard for Safety of Foam Equipment and Liquid Concentrates), Underwriter's Laboratories of Canada Listed CAN/ULC S560 (Standard for Category 3 Foam Liquid Concentrates) and International Civil Aviation Organization (ICAO) Airport Services Manual (DOC 9137-AN/898) Part 1 - Rescue and Firefighting, Level C Certified. Unlike competitive 3% MIL-SPEC AFFF concentrates, the UL Listing for ARCTIC 3% MIL-SPEC AFFF is not a minimalist certification; it is a comprehensive UL Listing that includes bladder tanks, proportioners and hand-line nozzles in addition to fire sprinklers.

HAVE QUESTIONS?

For more information about which foam product works best for specific applications — or other questions — contact your local authorized Solberg Distributor or Factory Representative.

Solberg is a member of THE AMEREX GROUP, an alliance of independent companies with a singular purpose: revolutionize the course of fire suppression technology with safer, more effective, and more sustainable solutions. Together, we are Moving Industries Forward by Redefining Fire Suppression. www.solbergfoam.com
