Press Release - Global Release
FOR IMMEDIATE RELEASE

Solberg Introduces Foam Concentrate Test Kits for Compliance Testing

GREEN BAY, WISCONSIN – The Solberg Company, the world's foremost innovator of firefighting foam concentrates and systems hardware announced today the availability of Foam Concentrate Tests Kits for compliance testing with fire protection regulatory safety codes and standards.

The Foam Concentrate Test Kit consists of collection bottles, service request forms (foam analysis request, foam proportioning results), return address labels and reusable shipping carton. Three different types of compliance testing are offered depending on customer requirements: Foam Quality Analysis, Proportioning Verification or United States Coast Guard Foam Quantity Analysis. Compliance testing service is offered through all three of Solberg's laboratories located in Green Bay, Wisconsin, Bergen, Norway and Sydney, Australia.

Foam concentrate or proportioning system test intervals will vary depending on the method and frequency of testing required relative to the type of protected risk and/or the requirements of the Local Authority Having Jurisdiction. Authorities may include fire service, insurance or building code officials. Most Authorities will require a proportioning test upon the installation and commissioning of a fixed foam system, in addition to a regular interval thereafter. Bulk foam concentrate in storage may also be subject to regular test intervals

as required by the Authority or defined by safety codes or standards such as, but not limited, to National Fire Protection Association (NFPA) 11: Standard for Low, Medium and High Expansion Foam; NFPA 16: Standard For The Installation of Foam-Water Sprinkler and Foam-Water Spray Systems; NFPA 25: Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems; NFPA 409: Standard On Aircraft Hangars; NFPA 412: Standard For Evaluating Aircraft Rescue and Fire-Fighting Foam Equipment; NFPA 418: Standard For Heliports and EN13565-2: Fixed Fire Fighting Systems – Foam Systems Design, Construction and Maintenance.

To learn more about foam compliance testing or obtain a Foam Concentrate Test Kit contact your local authorized Solberg products distributor or regional factory Solberg sales representative as found at <http://www.solbergfoam.com/contact.aspx>.

Based in Green Bay, Wisconsin with operations in Bergen, Norway and Sydney, Australia, Solberg has been involved with the manufacture of firefighting foams since the mid-1970s. Solberg is recognized throughout Europe and the Asia Pacific Region for its environmentally sustainable fluorosurfactant and fluoropolymer-free products that are an innovation in Class B firefighting foam. Additionally, Solberg manufactures a complete range of traditional C6 compliant foam concentrates, Class A and High-Expansion foam concentrates including foam systems hardware. Solberg's unique technology is preferred by customers in the aviation, chemical, energy, fire services, oil and gas, petrochemical, pharmaceutical, solvent & coatings markets.
