## Firefighting Foam – Antifoaming Agent

### ***XIAMETER® AFE-1520 Antifoam Emulsion***

Especially designed as an antifoaming agent in a variety of industrial and commercial applications including firefighting foam, XIAMETER® AFE-1520 Antifoam Emulsion will abate low, medium and high expansion foam. XIAMETER is suited for the abatement of foam in the support of fixed foam system expansion tests, accidental discharge of a foam system and firefighting foam training exercises.

XIAMETER works rapidly in stopping the generation of foam. This is especially important in the event of accidental spillage where excess foam can overflow and/or disrupt the operation of storm sewers and sewage treatment facilities. The area affected by the firefighting foam can be quickly cleaned and return to its normal operating state.

XIAMETER® AFE-1520 Antifoam Emulsion is a food grade, silicone emulsion. This antifoam is water dilutable and effective in both hot and cold systems. The mix ratio for use in abating firefighting foam can vary. Please consult the XIAMETER product datasheet for proper use, handling and storage of the product including local purchase.
